9/11 was an Inside Job:

Our Understanding After
Years Of Research & Due Diligence...

Peace Maker Society believes that the 9/11 attack on the United States of America were in fact an Inside job. There is an incredible amount of evidence that collapse of the Twin Towers and World Trade Centre 7 were planned, and obvious even to the untrained eye, were a controlled demolition. The implosion of the buildings falling directly on themselves and no other buildings is more than questionable.

The foreknowledge of the WTC 7 building collapse brings about more questions. Why people were evacuated from the area prior anything happening to the building? Two different news media giants, BBC and CNN reported the building collapsing prior to the collapse itself. Why would the media know about something before it happened, unless it was planned?
